

Cost-effective Unified Communications Application

InUC

Built-in video collaboration, document sharing, presence, IM & more

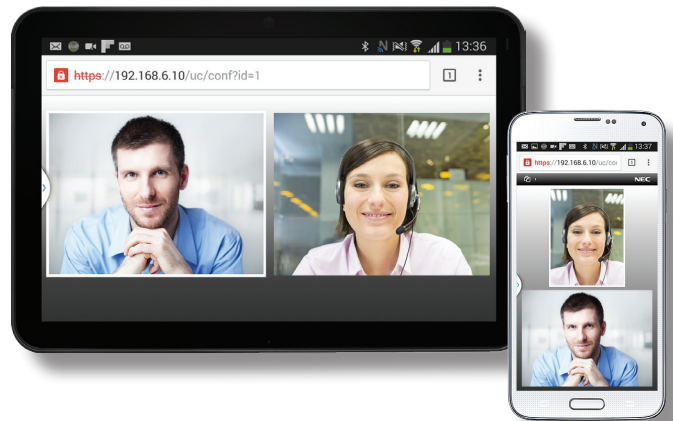

In today's working environment, employees are spread across different locations.

InUC is a unified communications application providing Video conferencing, collaboration, document sharing, presence and instant messaging for any business of up to 128 users.

Utilising WebRTC (Real-Time Communications) - InUC provides highly cost-effective video and collaboration working seamlessly within your IT environment.

Users are able to quickly set-up audio and video connections between two or more PCs or devices from anywhere with an internet and VPN or LAN connection.

As well as video and audio conferencing functionality, PC users can work collectively with screen share and shared documents. It's also ideal for live software demos and presentation slideshows.

InUC Uses & Business Benefits

- > **Increase your productivity levels:** Time-saving features for all your work force
- > **Web video conference:** Enabling travel saving, mobility, home working & multi-site organisations
- > **Screen sharing:** Provides collaboration on documents with multiple users
- > **Lower costs:** Single initial cost, no recurring monthly subscriptions
- > **Easy to use:** Minimal / no training required
- > **Always on 24/7:** Browser-based; remote access
- > **Easy contact management:** Contacts are auto-populated from email application enabling multi-cast messaging and more
- > **Presence:** Provides a 'bird's eye view' of your team's availability making users become more reachable
